Thermal Protection Technology

Nutech Anti-Corrosion Water Based Acrylic Metal Primer & NXT Cool Zone Infrared Heat Reflective Roof Coating is designed as a primer and Top Coating system for new and weathered steel, galvanized, zincalume, aluminium, lead, copper and pre-coated metal roof sheeting.

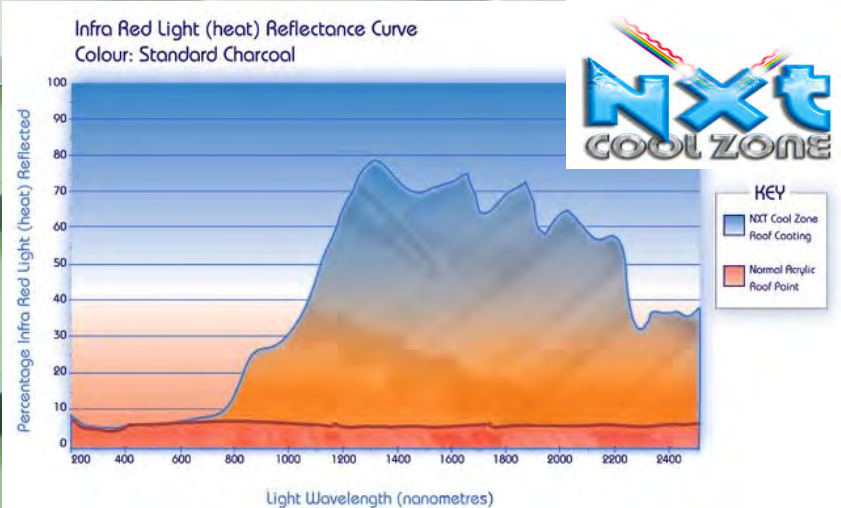

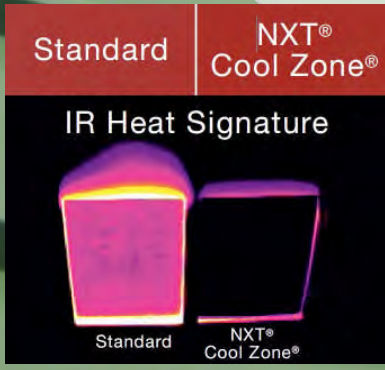

Nutech Metal primer is supplied standard in a mid-gray color, suitable for top coating with all Nutech top coatings including TileFlex 2000® and NXT Cool Zone® which are available in 36 colors

Nutech Metal Primer and NXT Cool Zone are acrylic coating, which demonstrates exceptional adhesion to a range of substrates including metal and masonry surfaces.

The coating provides good chemical resistance, weatherability and ease of application by brush, roller or airless spray. The coating is suitable for new and older weathered metal. The coating is suitable for all metal roofing and can also be used as a primer over Colored metal roofing and other coated metal sheet roofing products. Surfaces primed with Nutech Anti-Corrosion Metal Primer and top coated with NXT Cool Zone, perform exceptionally under conditions of hot, cold and wet weather. *Why Re-Roof?...When you can Re-Store.*

Features of Nutech Metal Primer and NXT Cool Zone system include:

- Improved hardness and flexibility
- Excellent long term resistance to corrosion and rust
- Easy application and clean up
- Suitable for new and weathered galvanised and zinc metal sheeting
- Weatherproof
- Excellent adhesion to a wide range of metal and masonry substrates
- Outstanding durability
- Oil and water resistant
- Finished in 36 colors
- Infrared Heat Reflective capability
- Environmentally friendly water based very low VOC technology
- Advanced cross linking polymer chemistry for ultra durability
- Fade resistant micronized pigments infused with saturated colour and highly resistant to chemicals, UV light and heat
- Revolutionary defoamer technology and advanced formula to eliminate micro foam, bacteria and biological contamination
- 100% waterproof guarantee

Thermal Protection Technology®

to reduce the temperature of your roof in summer. For the first time, you can reduce the heat of your roof and live more comfortably without sacrificing color choice. This will save energy and cooling costs. It will also reduce greenhouse emissions and the impact of your home on the environment while your roof looks great for many years to come.
